To whom it may concern

AmPath is one of Southern Africa's foremost private pathology laboratories. Our laboratories are fully accredited by the South African National Accreditation System (SANAS), and our services comply with all relevant ISO requirements. All laboratories that perform SARS-CoV-2 RT-PCR tests and COVID-19 IgM / IgG Antibody tests are ISO 15189:2012 accredited. SARS-CoV-2 RT-PCR and COVID-19 IgM / IgG Antibody tests in use within AmPath are CE-IVD marked and/or EUA FDA approved and have been internally validated and meet our internal requirements for acceptable test performance.

Due to the lockdown that has been in place, SANAS assessments have been delayed and the SARS-CoV-2 RT-PCR and COVID-19 IgM / IgG Antibody tests do not yet reflect on the individual performing laboratory's list/scope of tests on the SANAS certificates. These will be included once SANAS assesses and updates the certificates.

Yours sincerely
